

InSynch Energy Services are the UK distributor for Fuel Optimiser for all markets including commercial / industrial / public.

Fuel Efficiency	Cleaner Environment	Energy Cost Savings
Easy to Install	Non-Invasive Product	Lower Carbon + Emissions

We have a unique approach to reducing emissions from carbon based fuels by focussing on the fuels before consumed. This not only significantly reduces emissions from the consumed fuels but also increases the efficiency and economy of these resources.

Our empirical data collected from many installations has delivered these results:

- 80-90% reduction in hydrocarbon emissions
- 60-80% reduction in carbon monoxide emissions
- 20% reduction in nitrogen oxide
- 10-27% reduction in fuel usage

Industry	Hydrocarbon	Carbon Monoxide	Nitrous Oxide	Consumption
Smelting	Reduced by 68%	Reduced by 52%	Reduced by 11%	Reduced by 14%
Manufacturing	Reduced by 72%	Reduced by 58%	Reduced by 16%	Reduced by 18%
Hotel	Reduced by 78%	Reduced by 63%	Reduced by 14%	Reduced by 21%
Apartment Block	Reduced by 74%	Reduced by 67%	Reduced by 18%	Reduced by 19%
Warehouse	Reduced by 76%	Reduced by 65%	Reduced by 17%	Reduced by 20%

Installation Process

- Client provides copy of previous years bills
- Visit to carry out a survey
- Make proposal, if accepted, return to install equipment

Fuel Applicability

Natural Gas - Propane - Gasoline - Diesel

The equipment will reduce hydrocarbon emissions, carbon monoxide emissions and nitrogen oxide emissions and can reduce fuel usage to up to 27%.

Product Offer

The equipment is offered on a capex model where the client pays for the equipment and in some cases it can be free issue on the basis of an energy share with the client.

Please contact InSynch Energy for a no obligation quote, details below.
